

Mobile On-site Spraying Services

We have our own mobile on site architectural and commercial spraying division, utilising top of the range high-tech HVLP spray equipment, infrared drying lamps and four stage charcoal filtration systems. We use quality low VOC (volatile organic compounds), compliant 2K paints and lacquers, mixed to either a RAL colour or we can colour match to existing items.

We are able to prepare and paint out of office hours with minimal disruption most external and internal metallic and plastic components or surfaces.

These include:

- * Doors and frames
- * Stairs and handrailings
- * Air-conditioning pipework and ducting
- * Ventilator Grilles
- * Gates and fencing
- * Lift interiors and doors
- * Parking posts and bollards
- * Tables and chairs
- * Windows and frames
- * Building cladding
- * Door handles and light switches
- * Postboxes
- * Toilet flush panels

Contact our sales office for further details.

We also offer mobile rust removal and protection together with the latest soda and media blasting services by professional staff.

We can incorporate SteriTouch® antimicrobial technology into most paint and lacquer systems offering maximum protection against mould, fungi and harmful bacteria.
